

# Commonwealth Global Fund

Commentary | Performance as of March 2022

**OBJECTIVE:** The Global Fund's investment objective is to provide long-term capital appreciation and current income. The Fund invests primarily in equity, debt and convertible securities which may be both domiciled in the United States and foreign countries. The Fund may invest in companies of any size from any country, and there is a general focus on established companies in countries with developed economies.

**FOCUS:** With over half of the world's capitalization existing beyond the United States, the Global Fund was created to capture both domestic and global investment exposure.

**FUNDAMENTAL RESEARCH DISCIPLINE:** Robert Scharar has managed the Commonwealth Funds since its inception in 1991, and he is supported by FCA Corp's broader research team. The Fund's management studies a company's products and its market place, management, and integral finances, often requiring direct talks with the management of the company.

**BOTTOM-UP STOCK SELECTION:** Management seeks to invest in real companies and real products with understandable fundamental financials, and considers stocks and bonds across all sectors and market capitalizations.

**LONG-TERM VIEW:** The Fund seeks to build shareholder wealth by owning high quality companies over long periods of time.

**MANAGEMENT EXPERIENCE:** Selected investments are the result of an extensive team effort led by Robert Scharar, with over 40 years of international investment experience.

**RELATIVELY SMALL NUMBER OF HOLDINGS:** Within a well-constructed diversified portfolio, companies believed to be deserving of the portfolio manager's confidence are emphasized.

**NO LOAD FUND & LOW INITIAL INVESTMENT MINIMUMS:** The minimum initial investment is \$200 and there is no minimum for subsequent investments.

## RISK MEASURES (for trailing five years)

Alpha	-0.4	Standard Deviation	14.5
Beta	0.9	Sharpe Ratio	0.5
R2	0.9		

**ALPHA** is a measure of the portfolio's risk-adjusted performance. When compared to the portfolio's beta, a positive alpha indicates better than expected performance; a negative alpha indicates a worse than expected performance.

**BETA** is a measure of the volatility of the portfolio relative to the overall market. A beta of under 1.00 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market.

**R2** represents the percentage of the portfolio's movements that can be explained by the general movements of the market. Index portfolios will tend to have R2 values close to 1.00.

**STANDARD DEVIATION** is an indicator of the Fund's total return volatility, based on the last 60 monthly returns. The larger the standard deviation, the greater the Fund's volatility.

**SHARPE RATIO** uses standard deviation to measure a fund's risk-adjusted returns. The higher a fund's Sharpe Ratio, the better the fund's returns have been relative to the risk it has taken.

International investing may involve additional risks, such as social and political instability, market illiquidity, exchange-rate fluctuations, a high level of volatility and limited regulation. Investments in emerging markets involve even greater risks. Focus on a single country involves higher risk than a more geographically diverse international fund. Exposure to companies engaged in the natural resource and commodities markets may increase volatility. Small cap stocks are more susceptible to market volatility than larger cap stocks. The size of the fund's asset base may cause higher expenses which will detract from the fund's performance.

The return of principal in a bond investment is not guaranteed. Mutual funds have the same issuer, interest rate, inflation and credit risks that are associated with underlying bonds owned by the fund. Derivatives are more volatile than other investments due to liquidity risks, default risk and imperfect correlation risks and could lose more than the principal amount invested. The Fund may invest in open-end funds, closed-end funds, and exchange-traded funds ("ETFs") which will increase funds expenses.

Portfolio holdings will change due to ongoing management of the Fund. Reference to specific securities or sectors should not be construed as recommendations by the Fund, the Advisor or the Distributor.
